Thin Solid Films 271 (1995) 158–160

thin solid films

# Subject Index of Volume 271

Adhesion
scratch test adhesion and hardness evaluation of sputtered Nb coatings as a function of the argon gas pressure, 101
Alloys
a comparative study of hillock formation in aluminum films, 64
Aluminium
structure and composition of (Ti, Al)N films prepared by r.f. planar magnetron sputtering using a composite target, 15
the role of reactive diffusion in the growth kinetics of the icosahedral quasicrystalline $Al_4Mn$ phase: case of sequentially deposited thin films, 26
a comparative study of hillock formation in aluminum films, 64
Aluminium nitride
effect of hydrogen addition on the preferred orientation of AlN films prepared by reactive sputtering, 50
Amorphous materials
deposition of amorphous carbon layers from $C_2H_2$ and $CF_4$ with an expanding thermal arc plasma beam set-up, 56
bond switching, Si–H cluster formation and hydrogen effusion upon thermal annealing in hydrogenated amorphous silicon thin films, 151
Anisotropy
growth and mechanical anisotropy of TiN thin films, 108
Auger electron spectroscopy
friction and wear of the film formed in the immersion test of oil containing antiwear and extreme pressure additives, 88

Cadmium telluride
defect structure at a CdTe(111)/GaAs(001) interface, 117
Carbides
pyrolytic laser-based chemical vapour deposition of TiC coatings, 96
Carbon
deposition of amorphous carbon layers from $C_2H_2$ and $CF_4$ with an expanding thermal arc plasma beam set-up, 56
Chemical vapour deposition
demonstration of a method to fabricate a large-area diamond single crystal, 39
deposition of mixed metal oxides by MOCVD and PECVD, 69
pyrolytic laser-based chemical vapour deposition of TiC coatings, 96
multiphonon Raman scattering in $ZnSe/Zn_{0.80}Cd_{0.20}Se$ superlattices, 147
Chemisorption
gaseous oxidation and compensating reduction of lutetium bis-phthalocyanine and lutetium phthalo-naphthalocyanine films, 8
Coatings
preparation and tribological properties of sputtered polyimide film, 92
scratch test adhesion and hardness evaluation of sputtered Nb coatings as a function of the argon gas pressure, 101
finite element analysis of plastic deformation of various TiN coating/substrate systems under normal contact with a rigid sphere, 122
Conductivity
electrochemical switching to p- and n-type semiconductance with poly(3-methyl thiophene) film, 1

Elsevier Science S.A.

gaseous oxidation and compensating reduction of lutetium bis-phthalocyanine and lutetium phthalo-naphthalocyanine films, 8
Contacts
finite element analysis of plastic deformation of various TiN coating/substrate systems under normal contact with a rigid sphere, 122

Deposition process
the role of reactive diffusion in the growth kinetics of the icosahedral quasicrystalline $Al_4Mn$ phase: case of sequentially deposited thin films, 26
deposition and characterisation of ZnO thin films grown by chemical bath deposition, 35
second harmonic generation in self-assembled alternating multilayers of hemicyanine containing polymers and polyvinylamine, 73
pyrolytic laser-based chemical vapour deposition of TiC coatings, 96
Diamond
demonstration of a method to fabricate a large-area diamond single crystal, 39
Diffusion
the role of reactive diffusion in the growth kinetics of the icosahedral quasicrystalline $Al_4Mn$ phase: case of sequentially deposited thin films, 26

Electrical properties and measurements
electrochemical switching to p- and n-type semiconductance with poly(3-methyl thiophene) film, 1
Electron microscopy
oxidation of zinc particles vacuum-deposited in a high-resolution transmission electron microscope, 84
Epitaxy
demonstration of a method to fabricate a large-area diamond single crystal, 39

Fluorine
deposition of amorphous carbon layers from $C_2H_2$ and $CF_4$ with an expanding thermal arc plasma beam set-up, 56
Fourier transform infrared spectroscopy
bond switching, Si–H cluster formation and hydrogen effusion upon thermal annealing in hydrogenated amorphous silicon thin films, 151

Gallium arsenide
defect structure at a CdTe(111)/GaAs(001) interface, 117
Gold
nucleation and growth of gold on polypyrrole investigated by quantitative XPS and STM, 144
Growth mechanism
growth and mechanical anisotropy of TiN thin films, 108

Hardness
scratch test adhesion and hardness evaluation of sputtered Nb coatings as a function of the argon gas pressure, 101

Hydrogen
effect of hydrogen addition on the preferred orientation of AlN films prepared by reactive sputtering, 50

Interfaces
defect structure at a CdTe(111)/GaAs(001) interface, 117

Langmuir–Blodgett films
autoxidative oligomerization of an amphiphilic aniline in monolayers at the air–water interface, 138
Luminescence
multiphonon Raman scattering in $ZnSe/Zn_{0.80}Cd_{0.20}Se$ superlattices, 147

Manganese
the role of reactive diffusion in the growth kinetics of the icosahedral quasicrystalline $Al_4Mn$ phase: case of sequentially deposited thin films, 26
Metal-oxide semiconductor structure (MOS)
solar cells and high efficiency photo-diodes having metal-organic thin film-semiconductor structures, 132
Molybdenum oxide
deposition of mixed metal oxides by MOCVD and PECVD, 69

Nanostructures
second harmonic generation in self-assembled alternating multilayers of hemicyanine containing polymers and polyvinylamine, 73
Nitrides
structure and composition of (Ti, Al)N films prepared by r.f. planar magnetron sputtering using a composite target, 15

Optical properties
second harmonic generation in self-assembled alternating multilayers of hemicyanine containing polymers and polyvinylamine, 73
Optical spectroscopy
gaseous oxidation and compensating reduction of lutetium bis-phthalocyanine and lutetium phthalo-naphthalocyanine films, 8
autoxidative oligomerization of an amphiphilic aniline in monolayers at the air–water interface, 138
Organic substances
gaseous oxidation and compensating reduction of lutetium bis-phthalocyanine and lutetium phthalo-naphthalocyanine films, 8
solar cells and high efficiency photo-diodes having metal-organic thin film-semiconductor structures, 132
autoxidative oligomerization of an amphiphilic aniline in monolayers at the air–water interface, 138
Oxidation
oxidation of zinc particles vacuum-deposited in a high-resolution transmission electron microscope, 84

Photoconductivity
solar cells and high efficiency photo-diodes having metal-organic thin film-semiconductor structures, 132
Plasma processing and deposition
deposition of amorphous carbon layers from $C_2H_2$ and $CF_4$ with an expanding thermal arc plasma beam set-up, 56
deposition of mixed metal oxides by MOCVD and PECVD, 69
preparation and tribological properties of sputtered polyimide film, 92
Polymers
electrochemical switching to p- and n-type semiconductance with poly(3-methyl thiophene) film, 1
preparation and tribological properties of sputtered polyimide film, 92
autoxidative oligomerization of an amphiphilic aniline in monolayers at the air–water interface, 138
nucleation and growth of gold on polypyrrole investigated by quantitative XPS and STM, 144

Raman scattering
multiphonon Raman scattering in $ZnSe/Zn_{0.80}Cd_{0.20}Se$ superlattices, 147
Rutherford backscattering spectroscopy
evaluation of porosity and composition in reactively r.f.-sputtered $Ti_{1-x}Zr_xN$ films, 19

Scanning tunnelling microscopy
nucleation and growth of gold on polypyrrole investigated by quantitative XPS and STM, 144
Semiconductors
bond switching, Si–H cluster formation and hydrogen effusion upon thermal annealing in hydrogenated amorphous silicon thin films, 151
Silicon
bond switching, Si–H cluster formation and hydrogen effusion upon thermal annealing in hydrogenated amorphous silicon thin films, 151
Solar cells
solar cells and high efficiency photo-diodes having metal-organic thin film-semiconductor structures, 132
Sputtering
structure and composition of (Ti, Al)N films prepared by r.f. planar magnetron sputtering using a composite target, 15
evaluation of porosity and composition in reactively r.f.-sputtered $Ti_{1-x}Zr_xN$ films, 19
effect of hydrogen addition on the preferred orientation of AlN films prepared by reactive sputtering, 50
scratch test adhesion and hardness evaluation of sputtered Nb coatings as a function of the argon gas pressure, 101
growth and mechanical anisotropy of TiN thin films, 108
Steel
friction and wear of the film formed in the immersion test of oil containing antiwear and extreme pressure additives, 88
Stress
a comparative study of hillock formation in aluminum films, 64
Structural properties
structure and composition of (Ti, Al)N films prepared by r.f. planar magnetron sputtering using a composite target, 15
evaluation of porosity and composition in reactively r.f.-sputtered $Ti_{1-x}Zr_xN$ films, 19
Superlattices
second harmonic generation in self-assembled alternating multilayers of hemicyanine containing polymers and polyvinylamine, 73
multiphonon Raman scattering in $ZnSe/Zn_{0.80}Cd_{0.20}Se$ superlattices, 147
Surface and interface states
friction and wear of the film formed in the immersion test of oil containing antiwear and extreme pressure additives, 88

Titanium
structure and composition of (Ti, Al)N films prepared by r.f. planar magnetron sputtering using a composite target, 15
Titanium carbide
pyrolytic laser-based chemical vapour deposition of TiC coatings, 96
Titanium nitride
evaluation of porosity and composition in reactively r.f.-sputtered $Ti_{1-x}Zr_xN$ films, 19
growth and mechanical anisotropy of TiN thin films, 108
finite element analysis of plastic deformation of various TiN coating/substrate systems under normal contact with a rigid sphere, 122
Transmission electron microscopy
effect of hydrogen addition on the preferred orientation of AlN films prepared by reactive sputtering, 50
defect structure at a CdTe(111)/GaAs(001) interface, 117

Tribology
friction and wear of the film formed in the immersion test of oil containing antiwear and extreme pressure additives, 88
preparation and tribological properties of sputtered polyimide film, 92
Tungsten oxide
deposition of mixed metal oxides by MOCVD and PECVD, 69

Work function
electrochemical switching to p- and n-type semiconductance with poly(3-methyl thiophene) film, 1

X-ray photoelectron spectroscopy
nucleation and growth of gold on polypyrrole investigated by quantitative XPS and STM, 144

Zinc
single-source MOVPE growth of zinc sulfide thin films using zinc dithiocarbamate complexes, 4
deposition and characterisation of ZnO thin films grown by chemical bath deposition, 35
oxidation of zinc particles vacuum-deposited in a high-resolution transmission electron microscope, 84
Zinc oxide
deposition and characterisation of ZnO thin films grown by chemical bath deposition, 35
oxidation of zinc particles vacuum-deposited in a high-resolution transmission electron microscope, 84
